SEO plan for November 2026

What the website work is in November, why, what is already live, and what we need from you. Prepared 2 November 2026 from Google Search Console, Google Ads keyword data, live Google results for Perth, and the job records in the CRM.

1. Where the website stands

The October work (the price list, the installation cost guide and the internal links to them) is paying off. Organic Google visits are up by more than half against the September baseline, and the site's average ranking position has improved from about 25 to about 17.

Measure (Google Search Console, 28 days)	Baseline: to 27 Sep 2026	Latest: to 29 Oct 2026
Clicks from Google search	187	295
Times the site appeared in results	35,600	53,268
Average ranking position	25.4	17.2
Clicks from the Google Business Profile link	not measured	19

Where the clicks come from now: the price pages (price list and cost guides) are the biggest earners after the home page, followed by the brand pages and the door-type pages. The 35 suburb pages and 22 case studies earn almost nothing in search, so November adds no more of those.

The target set in October stands: **380 clicks per 28 days by about March 2027**. The November work is expected to lift clicks by a further 40 to 60 percent over the next two to three months; the rest depends on reviews, the Google Business Profile and links from other websites, which only you can drive (section 6).

2. Eight new pages, each backed by search demand

Every page targets searches that Google is already showing the site for but where no page of ours answered the question, or where the competition on page one is weak. Prices on every page come only from your price list; the written copy contains no typed prices, no claims about licences, years or warranties, and each page was checked for duplication against the other Perth garage-door sites before it was created.

Page	Why it exists (evidence)	Status
Roller Door Prices Perth /roller-door-prices-perth	About 1,300 appearances in 90 days for 'roller door prices perth' and similar, ranked 11 to 20 with zero clicks. Google's AI answer on that search quotes competitors' price pages. Shows the new-door, motor, refit, spring, lock and service figures from your list.	Live 2 Nov
Garage Door Cable Repair Perth /garage-door-cable-repair-perth	301 appearances at position 12 with no page to land on; cable jobs are the second most common job in the CRM after springs. Eight real cable jobs appear on the page as 'recent work'.	Live 2 Nov
Garage Door Lock Repair & Replacement Perth	'Roller door lock' is searched about 90 times a month in Perth. Priced from the roller door lock row.	Ready, publishes 3 Nov
Garage Door Sensor Repair Perth	Our sensor how-to article is shown 2,400 times a quarter but earns one click; this is the booking page it hands over to.	Ready, publishes 4 Nov

Page	Why it exists (evidence)	Status
Garage Door Off Track Repair Perth	'Track replacement perth' searches currently land on the home page; three real off-track jobs appear as recent work.	Ready, publishes 5 Nov
Garage Door Hinge & Roller Replacement Perth	The fix behind most noisy-door call-outs, priced from the hinges-and-rollers row; the Morley job is the proof photo.	Ready, publishes 6 Nov
Garage Door Seal Replacement Perth	Dust, rain and vermin complaints; seals and pelmets are on the price list but had no page.	Ready, publishes 7 Nov
Garage Door Repairs Wangara	The one suburb with measured demand (about 20 searches a month) and a commercial angle: factory and warehouse roller doors plus the homes of Madeley, Darch and Landsdale. Includes maintenance contracts.	Ready, publishes 8 Nov

Pages are published one a day so each one gets its internal links, its 'recent work' photos and its search engine submission on the day it goes live.

3. Eight existing pages improved

These are pages Google already shows on page one or two but that were not getting the click. Each got one targeted change: a title that matches what people type, the questions Google shows under 'People also ask', and links to the matching price guide. All eight are already live.

Page	What changed	Why
Garage door opener repair	Title now says 'Opener Repair & Replacement'; added a repair-or-replace section, three cost questions, link to the motors page	'Garage door opener repair' is searched 320 times a month in Perth with low competition; the page ranked 9 to 18 with no clicks
Garage door servicing	Title now 'Garage Door Service Perth'; four questions on cost, frequency and lubrication; home page now links to it with that phrase	'Garage door service perth' (210 a month) was landing on the home page instead
Commercial garage doors	Maintenance-contract section naming Wangara, Malaga, Kewdale, Welshpool, Canning Vale, Bibra Lake; three questions	The page is already number 6 for 'commercial garage door maintenance perth'
Roller doors	Sizes-and-prices paragraph, two questions, link to the new roller price guide	Ranked 7 to 13 for five 'roller door prices' searches with only 5 clicks
Garage door installation	Residential and roller installation paragraph, two questions, links to the cost guides and the brands directory	2,200 appearances a month at position 48
Sectional garage doors	Title now 'Insulated Panels & Prices'; prices-and-insulation paragraph, two questions	The general garage-doors page was outranking it for its own search
Home page and Service areas	Descriptions now lead with 'emergency and same-day' and 'northern and southern suburbs'	Both rank near position 5 for those phrases with almost no clicks
Emergency repairs and repair cost guide	Emergency description says 'urgent' and '24 hours'; the cost guide links to the installation guide for 'replacement cost'	Click-through fixes on searches already on page one

4. The ten-day schedule

Day	Date	New page	Also
1	Sun 1 Nov	Cable repair (created)	Opener page improved; monthly report row recorded
2	Mon 2 Nov	Roller door prices guide deployed; cable repair published	Roller doors page improved; search engines notified
3	Tue 3 Nov	Lock repair	Servicing page improved (done)
4	Wed 4 Nov	Sensor repair	Commercial page improved (done)
5	Thu 5 Nov	Off-track repair	Installation page improved (done)
6	Fri 6 Nov	Hinge and roller replacement	Sectional page improved (done)
7	Sat 7 Nov	Seal replacement	Home and emergency descriptions (done); menu and footer links to the new pages
8	Sun 8 Nov	Wangara	Replacement-cost links (done)
9	Mon 9 Nov	Link every published page from its hub, cost guide and job photos	Search engine submissions; request-indexing list
10	Wed 11 Nov	Review	Progress report against the September baseline

After day 10: a check on 1 December that the new roller price guide and the roller doors page share the 'prices' searches cleanly, the next monthly report, and the owner work in section 6 continuing through December, when search demand dips before the March peak.

5. What we are deliberately not doing

- **No more suburb pages** beyond Wangara. The 35 live suburb pages earned 3 clicks in the last month; the map pack takes those searches.
- **No 'roller shutters' page.** That search is dominated by window-shutter companies, not garage doors.
- **No separate 'northern suburbs' page.** The service-areas page already ranks about 6th for it; a second page would split the ranking.
- **No national how-to articles.** Google's AI answers them directly: one article was shown 180,000 times for 2 clicks.
- **No new prices and no new claims.** Nothing on the new pages says 'licensed', 'insured', 'lifetime warranty' or quotes a price that is not on your list.

6. What we need from you

The website work above is the part we control. The ceiling on rankings is authority and reviews, which only the business can build. In order of impact:

- **Ask every customer for a Google review after the job** (the short link capitalgaragedoors.com.au/review opens the review form). The map-pack leaders have 350 to 670 reviews; Capital has about 114. This is the single biggest lever for calls.
- **Request indexing in Google Search Console** for the new and changed pages. We send the list each day a page goes live; today's list is attached below.
- **Roller door prices by size.** The new roller price guide uses your standard new-door range. If you can approve single and double roller door bands (with and without motor), the guide gets stronger and matches what competitors publish.

• **Dealer listings.** Claim the manufacturer dealer-locator listings (B&D, Steel-Line, Gliderol, Avanti, Superlift, Boss, Perth Windsor Doors, Jaytech). Links from manufacturers are the most relevant links the site can earn.

• **Three claims to confirm or remove** on the website and the Google profile: '20+ years / 10,000 doors', 'no hidden call-out fees' (the price list has a call-out fee and an after-hours surcharge) and 'lifetime workmanship warranty' (the warranty page says 12 months). They must say the same thing everywhere.

• **Weekly Google Business Profile posts with job photos**, and the full list of services with prices on the profile.

7. How progress is measured

Every week we record a 28-day window from Google Search Console (clicks, appearances, average position, the Google Business Profile link, and each money page's ranking for its main search) and the leads recorded in Google Analytics by page (quote requests, bookings, call taps). The September figures are frozen as the baseline. We compare like-for-like periods: demand for garage door repairs in Perth peaks in September, bumps in March and dips in December and January, so a quieter January is not a sign the work has stopped working.
